Sarbanes Oxley, ISO27001, HIPPA, GLBA, PCI, SAS70, FFIEC, etc.
- Determining the Compliance Framework and the Compliance Life Cycle
- Designing & Implementing Policies & Procedures
- Information Security Awareness Training
- Information Security Audits
- Designing Business Continuity and Disaster Recovery Plans
- Penetration Testing
- Vulnerability Assessments
- Security Code Review & Application Security Review
- Access Control & Access Appropriate to Role
- Internal and External Audit
- Audit Remediation
- Business Process Re-Engineering
- Enterprise Monitoring
- Database Administration
- Server Software Installation and Upgrade
- Database Backup and Recovery Planning
- SQL and PL/SQL Functionality
- Database Security Planning, Design and Implementation

PMN's professionals have the breadth and depth of knowledge and skills to contribute to the success of your organization's Information Security and Compliance efforts.

Many of PMN's professionals are certified with one or more of the following designations: CISA, CISM, CISSP. While Information Security and Auditing are core skills of many PMN professionals, several also have complimentary skills/degrees such as Six Sigma, MBA, PMI, etc. to ensure the right mix of technical and business skills. It is because of this excellent combination of focused, yet diverse skills and experience that PMN can offer unparalleled value at any stage of the compliance life cycle.

Network Security

With new viruses, worms, hackers and intruders that are plaguing the Internet daily, your company needs a network that is safe from all this. Regardless of your network conditions, PMN has the security solutions for all your needs. From firewalls, intrusion detection, virus scanning, encryption, to security audits, we have the right expertise and technology to safeguard your data and network integrity.

- Hardware Firewalls
- IT Infrastructure Security Audits
- Security Tokens: RSA, Key Fob
- United Threat Management: Virus, Spam, Phishing and Spyware

Wide Area Network Design and Administration

To stay competitive, businesses need to operate in a networked world where access to people, information, and company resources are only a mouse-click away. High speed data connectivity, network storage, client server computing, wireless connectivity, and remote office computing provide new opportunities to streamline your business productivity. If your organization is not taking advantage of the following developments in network technology, let PMN put you back on the fast track.

- WAN/LAN/UPN Design, Analysis and Implementation
- Wireless Networks
- Thin Client Integration
- Internet Access
- Multi-Platform Integration
- Remote Office Solutions
- Voice/Data/VOIP Integration Services

Internet Technologies

In today's day and age, your company's website is your 24 hour, 365 days a year storefront. When customers and clients look for products and services, your company's website needs to stand out from the rest of crowd. PMN can improve your online presence both visually and technologically. From planning to delivery, one of our consultants can work closely with you to develop a website that provides the necessary impact and functionality for your organization in the following areas:

- Web Site / Portal Development (HTML)
- Intranet Design and Integration
- Wireless Web Development (WML, HDML)
- Messaging Systems
- E-Commerce infrastructure
- Electronic Document Management
